MEMORANDUM FOR: Deputy Director for Administration

FROM: James H. McDonald
Director of Logistics

SUBJECT: Request for Approval to Transfer
Funds to GSA

1. The Office of Logistics has transferred, to date, \$890,000 to the General Services Administration (GSA) for the purpose of installing additional switchgear in transformer Vault C. On 8 April 1980, GSA notified the Agency that they have escalated the estimated cost for this project by \$71,000. This escalation is valid up to the expected contract award date of 31 July 1980.

2. There has been no change in the scope of work for this project. The escalation is due to inflationary trends in the construction industry. Based on this information, approval was obtained from the Chief, Budget Management Group, Office of the Comptroller, to obligate \$71,000 against FAN No. 7278-1124 (FY77 lapsed appropriations).

3. Work order 77-1886-3 in the amount of \$71,000 has been prepared and is attached for your information. Transfer of these funds would bring the total project cost to \$961,000. Your approval to release this work order to GSA is requested.

for James H. McDonald
